-  120.000 m² storage
-  Planing mill of 6000 m²
-  ATG certified immersion unit

19th century

More than 175 years of know-how in wood import

van Hooorebeke Timber imports wood from all over the world to Europe for the professional timber trader and industry. Business started in 1842, with the first direct import of sawn timber from Riga to Ghent-Langebrück.

van Hooorebeke Timber is anchored in the port of Ghent and has direct access to the canal Ghent-Terneuzen. All activities are centralized at Kluizendok, which includes a storage area of 120.000 m², a planing mill, an immersion unit and a new office building next to the operational site.

A wide range of timber and panels from sustainably managed forests and an excellent service are essential to accomplish our mission namely, to be your trusted partner for quality timber.

21st century

The right species for every purpose

Our range of species and products is extremely large and varied, as is our knowledge of wood. We have more than 40 species of hardwood and softwood in stock. We offer modified wood and thermo-treated timber as well.

Planed or treated wood based on your project

van Hooerbeke Timber owns a planing mill as well as an ATG-certified immersion unit enabling us to meet your project's requirements.

Contact us for a custom-made solution. We will be glad to help you out in your research.

Modifications

Immersion

Immersed timber is often used in the roofing industry.

Through our certified A2 procedure, we treat lumber completely in an ATG certified immersion unit, according to the certified procedure to obtain service class A2.

Impregnation

van Hooerbeke Timber offers you the possibility to impregnate your timber. It can be treated in green, brown, or even in black.

Impregnation is frequently used in the preservation for outdoor applications.

Planing mill

The solar-powered planing mill provides flawless planing and sawing work. Also for tailor-made planing, stickering and cutting, you can rely on van Hooerbeke Timber.

Durability is a priority

Providing durable wood products is self-evident at van Hooerbeke Timber.
Wood - being the only renewable and natural building material - deserves a conscious exploitation strategy.
Hence our daily efforts to offer durable wood products, proof of which our FSC® - and PEFC-certificates.

Environment

PEFC™
